### **DETAILED ACTION**

1. According to paper filed on Jan. 18, 2005, the applicants have amended claims 12, 40 and 51.
2. Claims 1-51 are now pending in the application.

#### ***Response to Arguments***

3. Applicant's arguments filed on Jan. 18, 2005 have been fully considered but they are not persuasive regarding indefiniteness rejection of claim 34 and prior art rejections. The applicants have amended claims to overcome all other indefiniteness rejections. In regard to claim 34, this claim is substantial duplicate of claim 33. The applicants did not address this rejection at all in their response. The applicants need to cancel this claim and furthermore, amend claims 35 and 36 to correct their dependency. In regard to prior art rejections, the applicants have amended claim 51 to delete some values of variables R16-R18 to overcome prior art rejections. However, this amendment introduces new matter as discussed below in new grounds of rejection.

#### **NEW GROUNDS OF REJECTION**

##### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 51 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 51, the applicants have amended claim 51 to delete some values of variables R16-R18. However, the specific species with different values of variables R16-R18 are not disclosed. The compounds of formula IV are disclosed generically on pages 11-12. There are only five species disclosed in table 1 of the instant specification. Out of these five species, four species have values of variables R16-R18 as H while one species has value of one of these four variables ( R16-R18 ) as ethoxy while all other three are H. Therefore, this amendment introduces new matter in the claim.

***Conclusion***

6. Rejection of claim 34 under 35 U.S.C. 112, second paragraph is maintained for the reasons of record while all other rejections under 35 U.S.C. 112, second paragraph are now withdrawn.
7. All prior art rejections of claim 51 are maintained for the reasons of record.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

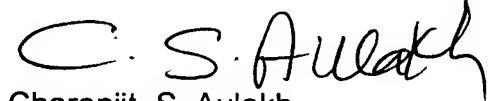

Art Unit: 1625

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
